ICN-2200L

PAD PRINTER WITH LINEAR CONVEYOR

The ICN-2200L is a 2 color automatic pad printer equipped with a linear conveyor (also known as over-under conveyor). The conveyor can be interfaced with automatic loading and unloading systems and is very convenient for printing high volumes of industrial, medical and promotional products. It is ideal for printing single or multicolor on injection molded parts, plastic housings and other smaller parts. The linear conveyor features shot pin print station registration for very tight registration (+/- .001") and a micro-adjust system for moving the conveyor in and out for easy positioning of the graphic on your part.

With the membrane touch control, it is simple to program all setup features including: pad stroke, pad delay, ink mixing and ink pick up frequency to name a few. The ICN-2200 automatic pad printer has ample compression capability and is able to accommodate large, hard print pads - making it one of the most versatile, capable and cost effective two-color pad printers available on the market today.

STANDARD FEATURES

- 18 station pneumatic indexing conveyor*
- Shot pin registration (+/- .001" tolerance)*
- Electro-pneumatic control*
- Photopolymer, steel and laser plate capable*
- Illuminated plate area*
- Heavy-duty construction with full cabinet stand*
- One or two color capability*
- Also available as single color*
- Auto ink mixing mode*
- Automated pad cleaning (optional)*
- Variable cycle delay*
- Membrane touch panel control*
- X-Y pad mounts*
- Electrical, pneumatic schematic package*
- Operations manual*
