B100-PC Tabletop

PAD PRINTER W/ AUTOMATIC PAD CLEANER

The B100-PC is a single-color sealed cup pad printer with an automated pad cleaning function. Utilizing Inkcups' patented VersaCup ink cup assembly (two-sided ceramic ring included) and tool-less setup, the B100-PC offers a quick and easy changeover. Unlike most tabletop printers, the B100-PC is manufactured for industrial, heavy duty performance. Gain complete control over variable inking and print frequency in order to increase print opacity.

The B100-PC automatic pad cleaning function is ideal for apparel and industrial environments where there may be a lot of sediment in the environment and regular pad cleaning is necessary.

Operation of the B100-PC is smooth and repeatable. The intuitive membrane touch control feature provides ease of program adjustments and machine functions. The ICN-B100 is perhaps the most versatile, capable and cost effective tabletop printer available to the pad printing industry. Suitable for most small to moderate sized parts, this machine excels in the promotional product, electronic, medical and tagless printing industries.
